Clubs

List of clubs will
show up here
for the admin
to choose and
interact with
members

Members

Members belonging to the clubs chosen on the left tab will appear
here

- The user admin that controls the club managers and members from the different clubs

Design Review

- The choice of color isn't too high contrasting and is fairly readable and scannable. All the divs are evenly spaced and do not have too much cognitive load. The top divs where the navigation panels are was a little small, so we changed it to make it slightly bigger, reducing the kinematic load.
- In the implementation, we decided to change the parallelograms of the events and RVSP because they were difficult to fit information in.
- We also reviewed other shapes in the website, and used rounded corners instead of sharp, as they would throw viewers off.

Perceivable

- The text is big enough to read, especially headings and important information.
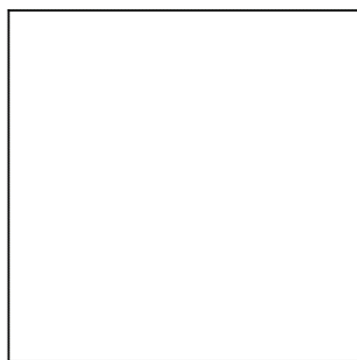

```
Welcome to
Club Name
```

About us

"Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut
labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation ullamco laboris
nisi ut aliquip ex ea commodo consequat. Duis aute irure dolor in reprehenderit in voluptate velit
esse cillum dolore eu fugiat nulla pariatur. Excepteur sint occaecat cupidatat non proident, sunt
in culpa qui officia deserunt mollit anim id est laborum."

Events

- The user will be attracted to the images and headings, letting them know ahead of what is on the page. For example the club page above:
- However, there is no implementation to assist deaf or blindness when navigating the website, like sign language or audio-only videos. Furthermore, users are not able to change the size of the font as it is fixed.

Operable

- All functionality is usable on a keyboard, and due to the big headings, users can scan quickly and read the information below it. There are no annoying drop down texts which can ruin the user's reading experience and space.
- All content on every page is static, there are no flashing colors or images.
- There are navigation tabs at the top. Furthermore, for every page the user is on, There is always a large heading at the beginning of the page to let the user know what information they are reading like below for example:

Understandable

- There is no use of acronyms and all text is generally understandable. However, some new users may not be familiar with the icons like the magnifying glass and profile picture icon, which can be confusing. But as they learn to navigate through the website, they will pick on them fairly well.
- All interactions on the website are fairly predictable, it is obvious what each function does. For example,
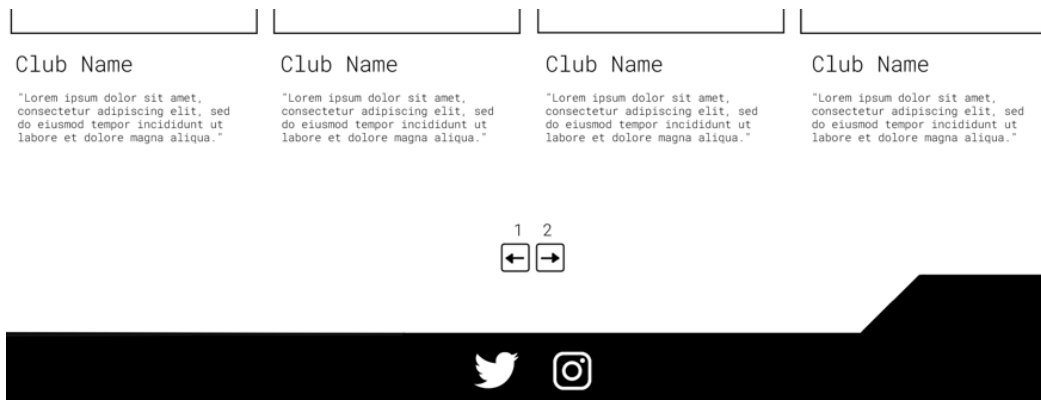

- The icons at the bottom correspond to social media, and clicking on them will lead to the social media page. Each tab on the navigation bar should lead to the specified page.
- Tick boxes when signing up to receive emails from clubs should be predictable.

Heuristics

- Text is very easy to follow, now abbreviations apart from icons that are assumed to be known. If it becomes too hard, users can hover over the icon to see an alt text, which we will consider in our design.
- If the user happens to be lost navigating the website, the home tab is always available in the navigation bar, where they can return to the main screen.
- The design is very simple and does not use many colours.
